Bilharziasis

International Academy of Pathology · Special Monograph

Edited by F. K. Mostofi, M.D., Chief, Division of Special and General Pathology,
Armed Forces Institute of Pathology and Veterans Administration Central Laboratory
for Anatomic Pathology and Research, Washington, D.C., Clinical Professor of Pathology,
Georgetown Medical School, Washington, D.C., Assistant Professor of Pathology,
Johns Hopkins University, Baltimore, Maryland, and Secretary-Treasurer,
International Academy of Pathology, Washington, D.C., USA.

From the Reviews

With 160 figures
VIII, 357 pages. 1967
Cloth DM 40,—
US \$ 10.00

"...Many interesting gross, histological, and x-ray pictures are shown. It is fascinating to read these fine reports and studies with all those illustrations. This book is a guide for the clinicians and pathologists who have the ambition to search for more information in this field, essential for the public health officers who are taking the direct responsibility to control this disease, and also good for the parasitologists who are interested in the host-parasite relationship, not the parasite per se".

Journal of the American Medical Association

"...The book consists of thirty papers contributed by the leading authorities on the disease. These deal with the life cycle, diagnosis, clinical, radiological, immunological and experimental aspects. Special attention is given to studies of the pathology, in an attempt to assess the damage done. This valuable book should be available to anyone concerned with problems of bilharziasis, a disease which remains one of the most important problems facing health workers."

RSH — Royal Society of Health Journal

"...Le principal intérêt du livre réside dans des mises au point sur le problème de l'immunité. Les résultats acquis dans ce domaine laissent augurer de l'introduction de techniques diagnostiques nouvelles et d'une orientation originale des recherches sur la pathogénie de l'affection. En démontrant dans ses conclusions la nécessité de nouvelles recherches F. K. Mostofi justifie la publication de ce livre dont l'édition est particulièrement soignée".

Parasitic Diseases in Africa and the Western Hemisphere

Early Documentation and Transmission by the Slave Trade

by R. HOEPPLI, M. D., D. SC.

Professor of Parasitology, Peking Union Medical College,
Peking 1930–52,

Visiting Professor of Parasitology, University of Malaya,
Singapore 1952–58,

Resident Director, Liberian Institute of the American Foundation for
Tropical Medicine, Harbel, Liberia, 1959–63.

Verlag für Recht und Gesellschaft AG Basel

4,400 current abstracts a year on DERMATOLOGY AND VENEREOLOGY in 13 fully indexed monthly issues

With the annual volume of medical literature published throughout the world increasing so rapidly, it becomes ever more difficult for the individual specialist to keep abreast of the latest developments in his particular field.

For this reason Excerpta Medica has been publishing since 1948, in English, a journal exclusively devoted to dermatology and venereology. Some 3,000 of the world's most important journals are screened consistently to form the basis for each of the 33 Excerpta Medica abstract journals.

Dermatology and Venereology currently

contains 4,400 abstracts per year. Each issue contains a subject and author index which is annually cumulated and published in a separate issue. This, as well as a detailed classification allows for rapid location of abstracts. The references in the subject index (computer-collated) are based on both the title and the contents of the article.
