Index dil dialect romontsch da Panaduz

Pieder Cavigelli

Sco basa fundamentala per la part lexicala dil tractat «Sgurdin e digren dil romontsch el process da germanisaziun»¹ publichein nus per l'entschatta igl index dil dialect romontsch da Panaduz sco el seresulta ord la publicaziun «Die Germanisierung von Bonaduz» cumparida 1969². Igl index porscha in tagl characteristic tras il svilup dil lungatg mumma romontsch egl act da germanisaziun. Sper ils numbs locals, pre- e surnums che representan intraglauter bein la fuorma originala, stattan expressiuns dialectalas genuinas. Quellas secruschan el romontsch da Panaduz d'ina vart cun la noziun dil lungatg da scartira (sursilvan) e dall'autra vart cun l'infiltraziun tudestga sco ella crescha ad in crescher cul progress dalla germanisaziun. Ferton ch'il plaid romontsch perda en fuorma e cuntegn sia valur originala, — quei s'exprima eclatantamein pass per pass — tschessa la forza assimilatoria dil plaid jester tudestg adina pli e pli. Ils germanissem vegls, assimilai alla tschontscha romontscha, sedistinguon evidentamein dall'infiltraziun duront la germanisaziun; cheu setracta ei buca pli d'imprests, mobein el ver senn dil plaid d'ina mischeida linguistica.

Ils renviaments a fuormas dublas e triplas, per gronda part documents da decadenza linguistica, faciliteschan l'interpretaziun dil svilup dil dialect romontsch da Panaduz el process da germanisaziun. Plaids tudestgs, ton ils assimilai sco ils infiltrai, stattan en virgulettas semplas e lubeschan da far in maletg dalla realitad; secapescha ch'igl index porta mo in diember fetg reduciu dallas noziuns tudestgas ord il stadi da mischeida dils lungatgs; quel ei denton representativs e basta per dar ina impressiun dalla situaziun linguistica.
