2. Organization of the Design Process IABSE Workshop in Zurich, Switzerland, May 13, 1986

Organisation

This IABSE Workshop will be conducted in place of the IABSE Colloquium, originally scheduled for Frankfurt, May 12–14, 1986.

This IABSE Workshop is organized in cooperation with the SIA Swiss Society of Engineers and Architects, FMB Specialized Group for Construction Management. It will be held at the Swiss Federal Institute of Technology, Zurich, on Tuesday, May 13, 1986.

The Workshop is devoted to the organization of the design process.

It will cover the following topics:

- Client's expectations
- Client design-construction organization
- Organizational tools and methods
- Interaction in design
- Designer-contractor relationships
- Outlook

The Workshop will be of interest to practising engineers and architects from contracting and consulting firms, private and public clients, universities and public authorities.

Participants to the workshop are expected to contribute and present a paper at the workshop. The attendance will be limited.

The sessions will be conducted in English.

Proceedings

The Workshop Proceedings including introductory lectures and all the papers accepted for presentation will be available at the Workshop as well as at the IABSE Secretariat.

Registration

Those interested in attending the Workshop are invited to contact the IABSE, ETH-Hönggerberg, CH-8093 Zurich, Switzerland, before March 1, 1986.

The final programme with all speakers' names and contributions will be mailed in April 1986.

3. Thin-Walled Metal Structures in Buildings IABSE Colloquium in Stockholm, Sweden, June 9–12, 1986

About 40 papers will be presented by specialists from some 20 countries, world wide, at the IABSE Colloquium on «Thin-Walled Metal Structures in Buildings». It will be held in Stockholm, Sweden, from 9 to 12 June 1986 and conducted in four sessions:

- Thin-Walled Components, New Developments in Theory and Practice
- Light-Gauge Metal Construction and Buildings Systems
- Composite Light-Gauge Metal Construction
- Building Physics in Light-Gauge Metal Construction

This will be a conference of very high calibre: the Colloquium Proceedings handed out to all participants at the beginning of the Colloquium will help provide very detailed and specialised discussions in a field which has recently experienced tremendous progress.

Poster sessions will complete the technical programme and this will be the place where the latest developments will be commented.

A technical excursion will conduct the participants to the works of SSAB Swedish Steel, one of the most modern steel producers of its type in the world.

The Final Invitation containing all technical and organizational details is available at the IABSE Secretariat. A reduced fee is offered to those who process their registration fee before March 15, 1986.

This Colloquium is arranged by the Swedish Group of IABSE in Cooperation with the Swedish Institute of Steel Construction and the European Convention for Constructional Steelwork.
