# Whenever Structural Safety is the Point ... Kern Precision Instruments are the Right Choice

For measuring distances up to 2500 m:

## Mekometer ME3000

Electro-optical Precision Distance Meter with the extremely high accuracy of  $\pm (0.2 \text{ mm} + 1 \text{ ppm})$  and a range of 2.5 km. Digital distance display to 0.1 mm.

Universal application: structural deformation measurements, large area slip and displacement measurements, precision layout work and fundamental surveying.

The Mekometer used for dam control measurements

For measuring length variations within a distance range of 50 m:

## Distometer ISETH

Precision instrument for accurate determination of length variations by means of Invar wires. Measuring accuracy  $\pm 1 \text{ ppm}$ ; length of the Invar wire 1—50 m; measuring range for length variations 100 mm.

Special advantages: lengths of any inclination including vertical may be measured; simple layout of the measuring arrangement.

Application: structural deformation measurements.

The Distometer ISETH used for tunnel wall deformation measurement

# Never before has measuring, reduction and recording been as simple as this!

The complete survey system for measuring, recording and transferring data to the computer. Angle and distance measurement are fully electronic. The Tachymat measures and displays: Hz and V angles, slope and horizontal distance, difference in height, height above datum, and coordinates. For setting out, it tracks horizontal angle and horizontal distance. With the recording unit attached, measured data, code and other information are recorded. Over 1800 points/blocks of information can be recorded on a cassette. And as cassettes can be inserted as required, the capacity is limitless. It's the most flexible, cost-effective recording and data-storage system.

The Tachymat is a field instrument. Rugged, reliable, accurate, designed for the surveyor. The latest technology coupled with Wild's years of experience in manufacturing surveying equipment see to that. And it's super to operate; just touch a key to measure and another to record. The Wild Tachymat TC1. Available now for today's surveyor. Ready for tomorrow's requirements.
