8. Secil Silo, Outão (Portugal)	16
9. Grain Terminal, Trafaria (Portugal)	18

As a result of the great effort of modernization, in view of the full integration of Portugal in the European Community, many important civil works are being built in the country, namely bridges, factories and public buildings. In this IABSE PERIODICA issue, some of these constructions are presented.

The organization in Lisbon, next September, of the 1989 IABSE Symposium on the theme «Durability of Structures», gives the opportunity to organize interesting visits to some of the most interesting structures recently built or under construction.

The Symposium gives continuity to the Portuguese participation in the IABSE activities. Recall that the Portuguese Group has already organized the 1956 IABSE Congress and an IABSE Symposium in 1973.

We look forward to meeting all of the IABSE members in Lisbon next September.

*Artur Ravara*  
*Chairman of the IABSE Portuguese Group*  
*Director of LNEC*
