## Steilhangterrassenhäuser am Nützenberg in Wuppertal

Maisons en terrasses sur un versant en forte pente à Nutzenberg/Wuppertal

Steep terraced complex on the Nützenberg in Wuppertal

Atelier 40 Gert Hergert + Partner,  
Wuppertal

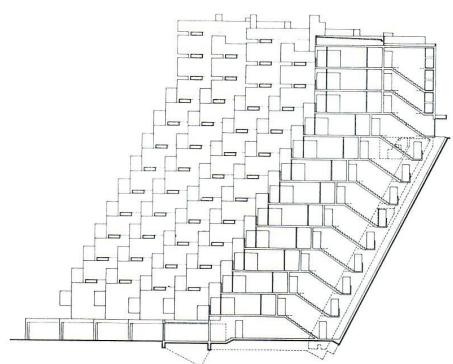

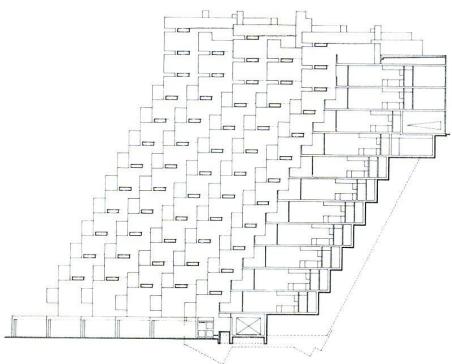

Das Terrassenhaus liegt in Wuppertal-Elberfeld, angelehnt an den 25 m hohen Steilhang an der Nützenbergstraße. Es wurde im Rahmen des normalen Sozialen Wohnungsbau mit zahlreichen bau- und wohnungsrechtlichen Ausnahmegenehmigungen erstellt. Der Baukörper weist total 66 Wohnungen auf, die auf total 12 Geschosse, davon 9 Hang- und 3 Obergeschosse, verteilt sind. Die Wohnungsrößen liegen zwischen 62 und 94 m<sup>2</sup> und haben alle zusätzlich eine Terrasse von 20 m<sup>2</sup>. Schrägaufzüge verbinden die Geschosse. Die Rohbaukonstruktion wurde zur Hauptsache aus Ortbeton in Serienschalungen hergestellt und mit Betonfertigteilen ergänzt.

Cet immeuble en terrasses situé à Wuppertal-Elberfeld est adossé à un versant haut de 25 mètres qui borde la route de Nutzenberg. Il fut édifié dans le cadre des constructions sociales courantes avec de nombreuses autorisations spéciales ayant trait à la construction et aux règlements immobiliers. Le volume renferme au total 66 logements répartis en 12 niveaux dont 9 sont terrassés et les 3 étages supérieurs normaux. La surface des logements oscille entre 62 et 94 m<sup>2</sup>; chacun d'eux est prolongé d'une terrasse de 20 m<sup>2</sup>. Des ascenseurs obliques relient les étages. Le gros œuvre est constitué principalement de béton coulé sur place dans des coffrages de série, il est complété par des éléments en béton préfabriqués.

The terraced units shown here are situated in Wuppertal-Elberfeld, on the 25 m high steep slope on Nützenbergstraße. They were erected within the scope of the standard public housing scheme, with numerous exceptional authorizations having been granted. The complex comprises a total of 66 flats, on 12 levels, 9 on the slope, and 3 upper floors. Sizes of units vary from 62 to 94 sq.m. All, in addition, have a terrace measuring 20 sq.m. Escalators connect the levels. The rough construction was done mainly in concrete poured in situ and finished with concrete pre-fab parts.
