Night landscapes

What does Switzerland look like at night when we are asleep? Could it be even more beautiful between the hours of dusk and dawn than during the daytime? The photographer Alessandro Della Bella allows us to explore the darkness that sometimes seems foreboding but is also magical and peaceful. He spent many nights awake so he could photograph Switzerland, producing spectacular images of mountains, cities and panoramas at night.

Book: "Helvetia by night"; Verlag NZZ libro, Zurich 2013; 192 pages, 100 images with photographic notes in the annex. CHF 84
