Annual compilation (1987 and 1988) of Hydradephaga (Coleoptera) papers

by M. Brancucci & K. Dettner

Abstract: The authors give a list of additional papers for 1984, 1985, 1986 and the 161 and 112 papers published during 1987 and 1988 respectively on all aspects of Hydradephaga (Coleoptera: Trachypachidae, Coptoclavidae, Necronectidae, Parahygrobiiidae, Hygrobiiidae, Amphizoidae, Haliplidae, Noteridae, Dytiscidae and Gyrinidae).

Key words: Hydradephaga – 1987 and 1987 – compilation.

The present compilation of Hydradephaga papers covering the years 1987 and 1988 includes 161 references from 173 authors for 1987 and 112 references from 117 authors for 1988.

The difficulties to achieve a complete annual list are amply illustrated by the additional references for 1984 (1), 1985 (5) and 1986 (15) and underscore the necessity of collaboration between Hydradephagan workers. Therefore we are greatly indebted to all colleagues for their active help in adding, correcting and controlling the references cited.

As in the previous compilation, only papers published in 1987 and 1988 have been included. Those publications recorded for 1987 or 1988 but actually published and issued in 1989 will be included in the 1989 compilation. Thus, if the name of an author is followed by two dates, the first refers to the year in which the publication was recorded, the second (in brackets) to the actual year of publication. Papers are quoted by their original titles apart from non-roman alphabetical publications where we furnished an English translation and indicate the original language within square brackets, e.g. Japanese [Ja], Russian [Ru], etc.
