## News from Switzerland

### BEER CONSUMPTION

In 1970, Switzerland's 59 breweries produced some 830 million pints of beer. The annual consumption per head of the population increased to about 135 pints, ordinary beer representing over 82% of the total consumption, 78% of it being sold in 6 decilitre (roughly 1 pint) bottles. Recently beer drinkers seem more and more to favour light and special beers. Sales of beer in cafes have fallen to 60% of the total, with a corresponding increase in the proportion of retail sales.
