**The electromagnetic Field due to a Uniformly
Accelerated Charge, with Special Reference to the
Case of Gravitational Acceleration**

by H. BONDI (London)

No manuscript has been submitted to the editors. See the paper by H. BONDI and T. GOLD in the Proceedings of the Royal Society, A. Vol. 229, pp. 416–424, 1955.

Diskussion – Discussion

W. H. McCREA: In view of the consistency that Prof. BONDI finds between his result and the principle of equivalence, it would be interesting to know if the force-system acting upon the charged particle including the radiative reaction, also leads to a consistent result.

H. BONDI: We have not investigated the radiative reaction. However, since the radiative part of the field is unchanged in the course of time, the radiative reaction presumably vanishes.
