Jörg Stollmann
Fred Truniger

Institut für Landschaftsarchitektur

The Kasernenareal (barracks ground) in Zurich, an urban site which is currently the object of an ongoing political dispute, served as a test site from which we were able to gain an understanding of the everyday use of urban public spaces. Using video, we contemplated the urban process and discovered the urban landscape.

This collection is a selection of student video projects in the diploma elective, winter semester 2002/03, at the Faculty of Landscape Architecture, ETH Zürich. The short videos on the DVD depict a work process and cover the different stages of student work.

Jörg Stollmann studied architecture at the University of the Arts Berlin, the ETH Zürich and Princeton University. He lectured on architecture at Princeton University, the Technical University of Berlin and the University of the Arts Berlin. In 2002 he founded Instant, Institute for Architecture, Nature and Technology, with Dirk Hebel. Since 2002 he has been head of the Media Lab at the Faculty of Landscape Architecture under Prof. Christophe Girot at the ETH Zürich, where he is currently teaching the Postgraduate Master of Advanced Studies in Landscape Architecture with Christophe Girot and Jacqueline Parish.

Fred Truniger holds a Master's degree in film studies from the University of Zurich. His main research interests are the representation of landscapes in films, the history of the documentary and avant-garde film and scientific imaging. Since 2001 he has been working at the Faculty of Landscape Architecture at the ETH Zürich, mainly teaching and developing a curriculum for the video modules of the Postgraduate Master of Advanced Studies in Landscape Architecture. At present he is writing a doctoral thesis on the perception of landscapes in films. He is a member of the programme committee of the documentary festival Filmwoche Duisburg, Germany.
