### I.

#### **Index geographicus**

continens locos natales Lichenum Helveticorum.

- Aarau, urbs primaria Argoviae propter flumen Aare, 360 m. s. m.  
Aathal, vicus Turicensis, 505 m.  
Aeugst, pagus sub radicibus occidentalibus montis Albis,  
    712 m.  
Affoltern, pagus Turicensis sub radicibus occidentalibus  
    montis Albis, 500 m.  
Aigle (Aquilegia), oppidulum in valle Rhodani, 419 m.  
Aïre, vicus Genevensis propter Rhodanum, 422 m.  
Alagna, oppidulum Pedemontanum ad fluvium Sesia in ostio  
    vallis d'Olen, 1205 m.  
Albignia, Vallis, in convallem Bergell exiens.  
Albis, mons patens juxta ripam occidentalem lacus Turi-  
    censis supra vallem sylvestrem fluminis Sihl, 918 m.  
Albisrieden, pagus prope Zürich sub radicibus occiden-  
    talibus montis Albis, 438 m.  
Albris, Piz, ad meridiem versus a Piz Languard apud  
    vallem da Fain, 3166 m.  
Albula, mons et transitus (2313 m) inter valles Bergün  
    et Engadin.  
Aletschhorn, ad meridiem a monte Jungfrau et ad sep-  
    tentriones a molibus glacialibus Aletsch, 4207 m.

- Alfaèdo (Faèdo), vicus in Valle Tellina inferiore ad ostium vallis di Bernasca.
- Alpe della Rocca, ad orientem a Trepalle in confinio Bormiensi.
- Alplerwald, prope Alpeln supra pagum Urnensem Sisikon, 1388 m.
- Alpthal, vallis sylvestris pratis abundans inter Einsiedeln (909 m.) et montes Mythen.
- Altorf, pagus primarius civitatis Uri inter fluvium Reuss et torrentem Schächenbach, 468 m.
- Amsoldingen, pagus Bernensis in radicibus montis Stockhorn, 660 m.
- Amsteg, pagus Urnensis ad viam Gotthardensem in infimis montibus Windgelle et Bristenstock, 506—540 m.
- Angera, oppidulum ad lacum Verbanum, 169 m.
- Antremont cfr. Entremont.
- Antonio, Sant', pagus in valle di Sotto ad flumen Adda, 1050 m.
- Anzasca, Vallis, inter vallem Macugniacam et oppidum Vogogna euronothum versus a Monterosa.
- Aosta, Vallis d', secundum torrentem Dora Baltea in confinio meridionali Valisiae.
- Aranco, pagus prope Borgosesia ad flumen Sesia.
- Ardez (Ardetia, Steinberg), pagus in valle Engadin inferiore, 1470 m.
- Arenthon, pagus ad flumen Arve inter Contamines et Bonneville in Sabaudia.
- Argentière, moles glaciales supra pagum ejusdem nominis (1270 m.) in valle Chamounix superiore.
- Argentine, mons inter Grand Muveran et Diablerets in orientem versus a Bex, 2418 m.
- Arola, moles glaciales in valle Valisiaca Arola, 2425 m.

- Arpette, Vallis d', inter occidentem et meridiem a vico Valisiaco Champey in valle ejusdem nominis.
- Arve, flumen e monte Col de Balme (2204 m.) oriens, prope Genevam in Rhodanum effluens.
- Aschera, vicus prope Ardez ad Oenum, 1442 m.
- Attinghausen, pagus ad flumen Reuss ex adverso Altorf, 470 m.
- Axenberg, mons imminens lacui Urnensi prope Flüelen, 1022 m.
- Baar, pagus Tugensis, 443 m.
- Bachthalen, fauces in confinio civitatum Zürich et Zug, 450 m.
- Baden, oppidum et aquae ad flumen Limmat, 282 m.
- Badus, mons cohaerens cum monte Tödi inter civitates Graubünden et Uri, 2977 m.
- Bagnes, Vallis de, a Martigny in valle Rhodani ad montem Col de Fenêtre (2699 m.) porrecta.
- Balma, La, vicus prope Riva in Valsesia.
- Barbavara, Castellum dei, supra Rocca Pietra in Valsesia inferiore.
- Bartolomeo, San, vicus infra S. Antonio in valle di Sotto, 1150 m.
- Basel, urbs ad flexum Rheni, 248 m.
- Bâtie, Bois de la, ad confluentes Rhodanum et Arve prope Genf, 359 m.
- Bedretto, Vallis di, pars occidentalis vallis Livino ab Airolo (1179 m.) in fastigio meridionali montis S. Gotthard ad transitum Nufenen (2443 m.) porrecta.
- Bella Tola, mons Valisiacus in meridiem versus a pago Leuk, 3090 m.
- Bellinzona (Bellenz), urbs ad Ticinum, 237 m.

- Belmi (Belmistrock), mons in meridiem spectans ab Altorf,  
2418 m.
- Belp, pagus ad torrentem Aare in radicibus montis Belp-  
berg, 534 m.
- Belpberg, mons secundum flumen Aare, 894 m.
- Bema, pagus in valle del Detto inter Morbegno (in valle  
Tellina inferiore) et montes Bergamascos.
- Bergell (Bregallia, Pergallia), vallis inter saltum Maloja  
et oppidum Chiavenna (332 m).
- Bergün, pagus in fastigio septentrionali montis Albula,  
1389 m.
- Bernardo, Monte San, in septentrionem a Lugano, 712 m
- Bernhard, St., transitus inter vallem Entremont et vallem  
Sabaudiae S. Remy, 2961 m; hospitium montis 2485 m.
- Bernhardin, transitus inter vallem Misox et Rheinwald-  
thal, 2139 m.
- Bernina, mons altissimus Rhaetiae in meridiem a valle Enga-  
din superiore, 4052 m.
- Beulet, locus in medio fastigio montis Salève.
- Bex, oppidum in valle Rhodani supra Aigle, 409 m.
- Biel, urbs ad lacum ejusdem nominis, 434 m.
- Bielersee, in civitate Bernensi, 434 m.
- Bitto, Vallis del, ad meridiem versus a Morbegno in valle  
Tellina inferiore.
- Birmenstorf, pagus ad rivulum Reppisch prope Zürich,  
505 m.
- Blatti, alps Urnensis in meridiem a pago Schattdorf, 676 m.
- Blickenstorf, vicus Tugensis prope Baar, 440 m.
- Blumenstein, vicus in radicibus montis Stockhorn, circa  
700 m.
- Bodengo, Vallis, supra Gordona in septentrionem a lacu  
Lario.

- Bonaduz, pagus Rhaeticus prope Reichenau, 654 m.
- Bonatchasse (Bonatchesse), in valle de Bagnes supra Fionay.
- Bondasca, Vallis, prope Bondo (581 m) in vallem Bregagliam patens.
- Borgosesia, oppidum Pedemontanum in meridiem ab oppido Varallo, 315 m.
- Bormio, oppidum in valle Tellina superiore, 1255 m. — Aquae novae 1340 m., aquae veteres, 2055 m.
- Bosa, alps supra Riva in Valsesia.
- Boscarola, Mons in meridiem a Scopello in Valsesia.
- Bossey, vicus ad fastigium septentrionale montis Salève.
- Bötzberg (mons Vocetius), in Argovia, 648 m.
- Bovernier (Bauvernier), pagus ad flumen Dranse in valle de Bagnes, 708 m.
- Brand, arx et vicus prope Mönchaltdorf, 458 m.
- Braulio, mons (2979 m) et transitus (2530 m) inter Münsenthal et Veltlin.
- Braunegg, castellum Argoviense prope Lenzburg, 557 m.
- Bregaglia cfr. Bergell.
- Bremgarten, pagus prope Bern, 517 m.
- Brezon (Brizon), mons prope Bonneville (445 m) ad flumen Arve.
- Brieg, oppidulum insigne coeli calida temperie in valle superiore Rhodani, 708 m.
- Brienz, pagus ad lacum ejusdem nominis, 604 m.
- Bristenwald, ad ripam dexteram fluminis Reuss prope Amsteg, 800 m.
- Brona, Vallis, ad occasum versus a lacu di Lecco.
- Bruggerberg, prope Aarau.
- Brunnen, pagus ad effluentem Muotha in lacum Urnensem, 438 m.
- Brunnithal, vallis reducta in Schächenthal patens.

- Bubikon, vicus in regione montuosa prope Riffersweil,  
545 m.
- Buchberg, pagus prope Schaffhausen, 542 m.
- Buchthalen, pagus prope Schaffhausen, 464 m.
- Buembachthal, vallis pratensis inter montes Bernenses  
Hohgant et Scheibenfluhe.
- Bündneroberland, territorium fluminis Vorderrhein a pago  
Trins usque in vallem Tavetsch.
- Buonas, castellum lacui Tugensi imminens, 443 m.
- Bürgeln, pagus Urnensis ad meatum Schächenthal, 550 m.
- Bürgistock, per errorem commemoratus pro sequente.
- Bürglistock, pars occidentalis seriei montis Albis supra  
Hausen.
- Calanda, mons in serie Tödi inter septentriones et occasum  
ab urbe Chur, 2810 m.
- Calar, alps montis Confinale in valle Furva prope Bormio.
- Calfeuserthal, vallis a molibus glacialibus Sardona ad  
pagum Vättis porrecta.
- Camogue, mons inter Airolo et Bellinzona, 2227 m.
- Campaggio, alps ad fastigium orientale montis Cima di  
Piazz in valle di Sotto. — Vallis prope Livigno.
- Campello, vallis et sylva inter oppidum Bormio et aquas  
Bormienses.
- Campilio (Campiglia), pagus Pedemontanus.
- Campofinale, in occidentem versus a Poschiavo, 2620 m.
- Campo, pagus in valle di Tartano.
- Campo, Il, alps prope Alagna in Valsesia.
- Campolungo, ad fontes fluminis Adda in valle di Fraèle  
prope Bormio.
- Camsciano (Canciano), mons (3107 m) et transitus (2550 m)  
supra Poschiavo.

- Capiago, Monte di, in meridiem versus ab urbe Como.
- Carmet, mons in septentrionem versus a Courmayeur in Sabaudia, 2998 m.
- Carcoforo, pagus in suprema valle Pedemontana di Sermenza, 1238 m.
- Casanna, claustra inter valles Engadin et Livigno, 2692 m.
- Catarina, San, vicus et aquae ferratae in valle Furva, 1726 m.
- Catogne, mons inter Bovernier, Sembrancher et Orsières, 2579 m.
- Cedrasco, in valle Tellina septentrionem versus a Sondrio.
- Cengi, I, Cengio rotundo, alps supra Roccorio prope Riva in Valsesia.
- Cenisius, Mons, inter Sabaudiam et Pedemontium.
- Ceppina, pagus in valle di Sotto ad ripam torrentis Adda.
- Cerdecco, alps in valle di Sotto prope Bormio.
- Ceresina, alps et sylva in valle Bormiensi di Furva.
- Cernobbio, pagus prope Rovenna ad lacum Larium.
- Champey, vicus in valle ejusdem nominis in occasum versus a monte Catogne.
- Chasseron, mons jurassicus a Granson in septentriones et occasum spectans, 1611 m.
- Châtelaine, vicus in occasum versus a Genf.
- Châtel St. Denis, pagus Friburgensis septentrionem versus a Clarens, 826 m.
- Chaumont, mons supra Neuchâtel, 1172 m.
- Cheyres, pagus Friburgensis prope Estaveyer, 455 m.
- Chiasso, oppidulum Ticinense in valle Fallopia, 232 m.
- Chiavenna, pagus ad flumen Mera in ostio vallis Bergell, 332 m.
- Chiesa, pagus in valle Malenco ad flumen Malero in septentrionem versus ab urbe Sondrio, 968 m.

- Chur (Curia, Coire, Cuera, Quera), urbs prope influentem torrentem Plessur in Rhenum, 599 m.
- Churerjoch, in septentrionem versus a monte Gürgaletsch, 2038 m.
- Churwalden, pagus supra Chur, 1212 m.
- Cimalmotto, pagus Ticinensis in valle Maggia.
- Coinsins, vicus prope Nyon.
- Col du Géant, mons serie cohaerens cum Montblanc inter vallem Chamounix et Courmayeur, 3428 m.
- Colico, emporium septentrionale lacus Larii, 220 m.
- Colombier, mons jurassicus prope Genf, 1689 m.
- Como, urbs (215 m) ad lacum Larium (lago di Como, 212 m).
- Compesières, papus prope Genf, 479 m.
- Constanz cfr. Konstanz.
- Contamines, pagus in occidentem versus a Montblanc, 1172 m.
- Cormet cfr. Carmet.
- Corni di Canzo, ad ripam dexteram lacus di Lecco, 1374 m.
- Corno bianco, supra moles glaciales d'Otro inter Gressoney la Trinité et Riva, 3351 m.
- Cotschen, Piz, in valle Rhaetica Tasna in orientem a Guarda et Ardez, 3029 m.
- Crête de Thion, mons in meridiem versus a Sitten, 2430 m.
- Creux de Pransiouz, in monte jurassico Reculet.
- Creux du Vent, fauces prope Travers in monte Jura, 1465 m.
- Crevin, pagus in fastigio occidentali montis Salève.
- Cristallo, Monte, prope aquas Bormienses, 3950 m.
- Cuolm da Vi (Brunnipass), inter Dissentis et Maderanerthal, 2736 m.
- Davos, vallis et pagus (1557 m) Rhaetorum inter valles Engadin, Prättigäu et Schanfigg.

- Dent de Morcles, inter ortum brumalem et meridiem a St. Maurice spectans, 2938 m.
- Dent du Midi (Mont Jorat), ad meridiem a St. Maurice spectans, 3285 m.
- Dentro, Vallis di (Val Viola), supra Bormio.
- Diablerets, mons in orientem versus ab Aigle, 3251 m.
- Distelgrat, prope moles glaciales Aletsch, 3400 m.
- Doan, Piz (Duana, Daon), inter valles Bergell et Avers in septentrionem a Vicosoprano, 3133 m.
- Dôle (Dola, Dolaz), mons jurassicus inter lacum Leman et Dappenthal, 1679 m.
- Dombresson, pagus Neocomensis in valle de Ruz, 751 m.
- Domodossola, urbs Pedemontana in occidentem versus a lacu Verbano, 306 m.
- Dossi, Jugo dei, inter Semogo et Trepalle in confinio Bormiensi.
- Dranse, flumen prope Martigny in Rhodanum influens.
- Eaux-Vives, prope Genf.
- Ebenalp, alps septentrionalis montis Alpstein, 1600 m.
- Eggberg, mons Urnensis supra Flüelen, 1700 m.
- Eggishorn, mons Valisiacus prope moles glaciales Aletsch, 2941 m.
- Emmenmattschachen, vicus prope Schangnau in Emmenthal.
- Emmenthal, vallis Bernensis inter Hohgant et Burgdorf, 584 m.
- Ems (Amedes), vicus prope Chur, 573 m.
- Engadin, vallis a saltu Maloja ad claustra Finstermünz (912 m) pertinens.
- Engelberg, convallis et monasterium (1041 m) in civitate Unterwalden.

- Engstlenalp, mons Bernensis in occasum vergens a monte Titlis, 1857 m.
- Entremont, vallis secundum flumen Dranse a monte St. Bernhard ad pagum Sembrancher porrecta.
- Erlenbachertobel, prope Zürich.
- Ermatingen, pagus Thurgoviensis inter Konstanz et Stein, 411 m.
- Erosa (Arosa), pagus in valle Rhaetica Schanfigg, 1892 m.
- Erstfelden, pagus Urnensis ad flumen Reuss, 470 m.
- Erstfelderthal, vallis inter pagum Erstfelden et Schlossberggletscher.
- Esery, pagus in radicibus orientalibus montis Salève.
- Etzlithal, vallis Urnensis reducta in Maderanerthal patens.
- Faulhorn, mons inter Brienzsee et vallem Grindelwald, 2683 m.
- Felsberg, pagus Rhaeticus in radicibus meridionalibus montis Calanda prope Chur, 568 m.
- Felseneck, supra Zug, 982 m.
- Fenera, mons in Valduggia supra Borgosesia, 1371 m.
- Ferret, Vallis, in meridiem versus ab Orsières in valle d'Entremont ad montem Col de Ferret (2492 m) porrecta.
- Feuerstein, mons inter Luzern et Unterwalden, 2042 m.
- Fex, Vallis, in meridiem versus a St. Maria in valle Engadin superiore.
- Fibia, mons in occasum versus ab hospitio St. Gotthardi, 2742 m.
- Fionay, vicus in valle superiore de Bagnes, 1527 m.
- Fisentergrat, in occasum versus a monte Kammerstock in valle Urnerboden, 2057 m.
- Flüela, transitus inter Davos et vallem Engadin inferiorem, 2405 m.

- Flüelen, pagus ad lacum Urnensem, 437 m.
- Folaterra, mons supra Fully.
- Forch, locus editus prope Zürich, 690 m.
- Forclaz, pagus supra Aigle in valle Ormonts-dessous, 1282 m.
- Forcola, Vallis di, prope Berninam supra Poschiavo.
- Forno, Vallis del, inter montes Cevedale (3618 m) et Tresero (3355 m) in orientem versus a S. Caterina.
- Forst, sylva prope Bern.
- Fouly cfr. Fully.
- Fraèlle, Val di, vallis edita secundum flumen Adda supra Bormio.
- Freynières, pagus supra Bex, 1080 m.
- Frienisberg, vicus inter Bern et Aarberg, 729 m.
- Frohburg, castellum in monte Jura, 845 m.
- Frohnalp, mons prope Schwyz, 1911 m.
- Fully, mons (2000 m) et pagus (464 m) ad ripam dexteram Rhodani prope Martigny in Valisia.
- Furkahorn, supra transitum alpinum Furka, 2436 m.
- Fürstenau, pagus in valle Rhaetica Domleschg, 650 m.
- Furva, Vallis, secundum flumen Frodolfo inter Bormio et S. Caterina porrecta.
- Fusine, pagus ad ostium vallis Madre in valle Tellina.
- Galenstock, mons in septentrionem a transitu Furka, 3598 m.
- Gallen, St., urbs primaria civitatis ejusdem nominis, 676 m.
- Gampeln, in meridiem versus a pago Urnensi Schattdorf, 1500 m.
- Gampelnwald, prope Gampeln.
- Gand s. Gant, infra montes Urnenses Hund- et Hagelstock, 1803 m.
- Gantrisch, mons in serie Stockhorn, 2183 m.

- Gasternthal, a molibus glacialibus Tschingel ad vicum Kandersteg (1170 m) porrecta.
- Gavia, mons in valle di Rezzo, 3582 m.
- Gemmi, transitus inter aquas Leuck et vallem Bernensem Kanderthal, 2525 m.
- Getroz, moles glaciales in valle superiore de Bagnes.
- Gex, oppidum sub radicibus montis Jura ad viam per transitum Col de la Faucille ducentem.
- Giacomo, S., Vallis, in septentrionem versus a Chiavenna.
- Gibel (Gibelstock), mons in occasum a pago Urnensi Altorf, 1851 m.
- Gioera, Vallis, sub radicibus montis Boleto supra Como.
- Girola, pagus in valle del Detto inter Morbegno (in valle Tellina) et montes Bergamascos,
- Gitschen, mons prope Flüelen, 2456 m.
- Gitschenthal, in septentrionem a monte Gibelstock inter transitum Surenen (2305 m) et Altdorf (440 m).

tem Spluga in vallem Tellinam patens.
- Mastallone, Vallis, supra Varallo.
- Matterhorn (Mont Cervin), prope Zermatt, 4482 m.
- Maurice, St., oppidum Valisiacum in valle inferiore Rho-  
dani, 409 m.
- Mayenthal, vallis Urnensis inter Wasen (917 m) et Susten-  
Scheidegg.
- Meiringen, pagus Bernensis sub radicibus montis Hasli-  
berg, 600 m.
- Mello, Vallis di, in vallem de Masino patens.
- Mergozzo, urbs Pedemontana prope Ornavasso ad flumen  
Toce.
- Messen, pagus in meridiem a Bucheggberg in civitate Solo-  
thurn, 500 m.
- Mettelhorn, mons in septentrionem versus a Zermatt,  
3410 m.
- Mettenthal, infra montem Bernensem Rossstock.
- Mettmenstetten, pagus Turicensis inter Affoltern et Knonau,  
474 m.
- Meyenfeld, oppidulum Rhaeticum, 505 m.
- Mezdi, Piz, in valle Engadin inferiore in septentrionem  
versus a pago Lavin, 2924 m.
- Minghèr, Vallis, in vallem Rhaeticam Scarl patens, 1693 m.
- Minschun, Piz, prope Tarasp, 3071 m.
- Misox, Vallis (Mesaucum), inter transitum Bernardin et  
oppidum Roveredo.
- Mittenberg, mons supra Chur.
- Molins, pagus in valle Oberhalbstein, 1473 m.
- Molleo cfr. Mollia.

- Mollia, pagus Pedemontanus ad flumen Sesia, 488 m.
- Mönchaltorf, pagus ad lacum Turicensem Greifensee, 458 m.
- Monnetier, pagus in monte Salève, 721 m.
- Montasca, Vallis, in vallem Vogna patens.
- Montblanc, mons altissimus Europae, in confinio meridionali Helvetiae, 4800 m.
- Monte, S., prope Varallo, 605 m.
- Monte Cenere, supra influentem Ticinum in lacum Verbanum, 553 m.
- Monte Grona cfr. Grona.
- Monte della Parete cfr. Parete.
- Monte di Varallo, locus sacer supra Varallo.
- Monte Rosa, in confinio meridionali Valisiae, 4566 m.
- Monterossa, prope lacum Verbanum.
- Monte rosso, prope le Prese in confinio Bormiensi.
- Monte Salvatore, ex adverso Lugano, 908 m.
- Monvoisin, in valle superiore de Bagnes, 1756 m.
- Mörel, pagus ad Rhodanum supra Brieg, 520 m.
- Moriz, St., pagus in valle Engadin superiore, 1855 m.
- Mornez, vicus in Sabaudia infra montem Salevula.
- Morteratschgletscher, in septentrionem versus a monte Bernina.
- Mosses, Les, vallis inter Ormonts-dessus et Pays d'Enhaut, 1439 m.
- Mundaun, Piz, prope Ilanz, 2112 m.
- Muottathal, inter oppidum Schwyz (514 m) et saltum Pragel (1543 m).
- Muretto, Vallis, inter transitum Maloja et vallem Malenco.
- Mürren, vicus in valle Lauterbrunn, 1630 m.
- Mürtschenalp, vallis inter montem Mürtschenstock (2441 m) et Murgthal.
- Muthorn, mons in valle Ursern, 3103 m.

- Muveran, Grand, mons in orientem a St. Maurice, 3061 m.
- Mythen, Grosse (1903 m) et Kleine (1761 m), montes prope Schwyz.
- Naïrs, vicus prope aquas Tarasp.
- Napf, mons in Emmenthal, 1408 m.
- Naters, pagus Valisiacus prope Brieg, 744 m.
- Nesselthal, prope montem Susten.
- Neubrück, vicus prope Bern.
- Neuchâtel, urbs in radicibus montis jurassici Chaumont, 437 m.
- Neuenburgersee, 435 m.
- Neuenstein, arx destructa prope Delsberg.
- Nicolai, St., in valle Valisiaca Visp, 1163 m.
- Niederbauen (Selisberger Kulm), mons in occasum versus a lacu Urnensi, 1927 m.
- Niesen, mons inter Fruttigen et Niedersimmenthal, 2365 m.
- Notungs, Vallis, a monte Cima da Flix (3205 m) ad vicum Marmorera (1634 m) in valle Oberhalbstein porrecta.
- Nufenen, pagus in Rheinwaldthal, 1576 m.
- Nunnenen (Neuenen, Nünernen), mons Bernensis, 2113 m.
- Oberalp, transitus et vallis inter Andermatt (1422 m) et vallem Rhaeticam Tavetsch.
- Oberengadin, pars superior vallis Engadin inter transitum Maloja et pagum Brail (1652 m) prope Zernetz.
- Oberfeld, vicus Urnensis inter ortum brumalem et meridiem a Schattdorf.
- Oberhasli, vallis inter hospitium in monte Grimsel et lacum Brienz (563 m).
- Oberottikon, vicus prope pagum Turicensem Hinweil, 542 m.
- Oberuster, pars superior oppiduli Turicensis Uster, 467 m.
- Oeschenenthal, supra Kandersteg. Lacus in media valle 1588 m.
- Olen, Monte, supra Alagna in fundo Valsesiae, 3533 m.

- Olterhorn (Corno d'Otto), mons prope Alagna in Valsesia.
- Onex, pagus Genevensis, 432 m.
- Ormonts-dessus, vallis inter montes Diablerets et Tournette.
- Ornavasso, urbs Pedemontana ex adverso Mergozzo ad flumen Toce, 585 m.
- Ostermündingen, pagus Bernensis, 715 m.
- Ot, Piz, prope Samaden in valle Engadin, 3249 m.
- Otro, Vallis d', in Valsesiam patens, 1650 m.
- Ottenhausen, vicus Turicensis prope Pfäffikon.
- Ötweil, pagus Turicensis sub fastigio septentrionali montis Pfannenstiel, 544 m.
- Ovago, alps in valle Vogna supra Riva.
- Padella, Piz, prope Samaden, 2883 m.
- Palanca, mons in valle Vogna prope Riva.
- Paneyrossaz, moles glaciales prope montem Argentine, 2705 m.
- Parete (Parè), mons inter Livigno et Trepalle.
- Parpan, pagus Rhaeticus supra Chur, 1551 m.
- Peccia, Vallis, in occasum spectans a Fusio (1316 m) in valle Maggia Ticinensi.
- Petersinsel, in lacu Biennensi.
- Pfaffensprung, pons supra pagum Urnensem Wasen, 799 m.
- Pfäffikon, pagus Turicensis, 546 m.
- Pfäfers, aquae (685 m) et pagus (820 m) supra Ragatz.
- Pfannenstiel, mons inter pagos Turicenses Meilen et Mönchaldorf, 851 m.
- Piatta, vicus prope Bormio.
- Pic Remand, prope montem la Tournette in valle Ormonts-dessus supra Aigle, 2552 m. Cfr. Müll.-Arg. in *Flora* 1870 p. 257.

- Pierre, St., pagus Valisiacus ad transitum S. Bernhard, 1625 m.
- Pilatus (Mons pileatus, Frackmund), mons prope Luzern, 2228 m.
- Pilberg, inter Alagna et montem Turlo in Valsesia superiore.
- Pisella (Alpisella), vallis in confinio Bormiensi.
- Pissole, alps inter occasum et septentrionem versus a Peccia in valle Vogna.
- Pitons du Salève, culmen montis Salève, 1383 m.
- Piz Albris cfr. Albris.

- Scheidegg, Grosse (2069 m) et Kleine (1961 m), transi-  
tus alpium Bernensium.
- Schieneige Platte, mons in meridiem versus ab Interlaken  
2064 m.
- Schindellegi, pagus inter lacum Turicensem et Einsie-  
deln, 757 m.
- Schmadribachfall, in septentrionem versus a Breithorn-  
gletscher.
- Schöllen, fauces prope Göschenen.
- Schreckhorn, mons prope Grindelwald, 4082 m.
- Schwalmeren, mons in meridiem a monte Suleck, 2737 m.
- Schwarenbach, hospitium in monte Gemmi, 2065 m.
- Schwarzhorn, prope Monte Rosa inter Vincentpyramide  
et Fallerhorn (Monte Turlo), 4259 m.
- Schwarzhorn, supra Tourtemagne, 3200 m.
- Schwarzsee, inter montem Matterhorn et Platten in su-  
prema valle St. Nicolai, 2037 m.
- Schwarzwald, prope Chur infra montes Spontisköpfe.
- Schwarzwasser, torrens Bernensis supra Riedburg in  
flumen Sense influens.
- Schwendialp (Schaer. *Spic.* p. 453), mihi ignota.
- Schwyz, oppidum primarium civitatis ejusdem nominis in  
radicibus montium Mythen, 514 m.

Scopa, oppidum in Valsesia inferiore in septentrionem a Scopello.

Scopello, pagus in Valsesia, 679 m.

Scopi, Piz, inter Val Cristallina et Val Medels, 3200 m.

Seedorf, pagus Urnensis prope Altorf, 441 m.

Seehorn, Davoser, supra Davos-Dörfl, 2241 m.

Selisberg, pagus Urnensis in fastigio septentrionali montis Niederbauen, 759 m.

Sella bassa, La, mons supra Scopello in Valsesia.

Selle, Le (Sella della Montata), alps prope Peccia in valle Vogna.

Sembrancher (Saint-Branchier), pagus in valle de Bagnes, 794 m.

Semogo, vicus in valle Bormiensi Viola, 1424 m.

Sepey, Le, pagus in valle Ormonts-dessous supra Aigle, 1212 m.

Sermenza, Vallis, inter pagos Pedemontanos Carcoforo et Rimasco.

Seewen, pagus prope Schwyz, 461 m.

Sidelhorn, in occidentem versus a transitu Grimsel, 2880 m.

Siders, pagus Valisiacus inter Sitten et Leuk, 579 m.

Signau, pagus Bernensis inter Bern et Langnau, 687 m.

Sihl, flumen prope Zürich cum flumine Limmat confluens.

Sihlwald, silva inter montem Albis et flumen Sihl.

Simpeln, pagus inter montem Fletschhorn et Monte Leone, 1410 m.

Simplon, mons et transitus (2020 m) inter Valisiam superiorem et vallem Pedemontanam d'Ossola.

Sisikon, pagus Urnensis inter Frohnalp et Axenberg, 437 m.

Sitten, oppidum primarium Valisiae ad flumen Rhodanum, 528 m.

- Sobretta, Vallis di, inter montem Gobetta (3000 m) et  
montem Sobretta prope S. Caterina.
- Soliat, mons cuius in fastigio occidentali fauces Creux du  
Vent, 1465 m.
- Solothurn, urbs primaria civitatis ejusdem nominis, 431 m.
- Sondrio, oppidum primarium vallis Tellinae, 347 m.
- Sotto, Vallis di, secundum flumen Adda prope Bormio.
- Sparon, mons supra Mollia in Valsesia.
- Speer, mons prope Wesen, 1956 m.
- Spitzliberg, mons Urnensis in Mayenthal, 3418 m.
- Spluga, Monte, in septentrionem versus a pago Mello in  
valle Tellina, 2845 m.
- Splügen, transitus inter Rheinwaldthal et Val S. Giacomo,  
2115 m.
- Spontisköpfe, montes in meridiem versus a Chur, 1839 m.
- Stachelberg, mons et aquae ferratae (664 m) prope  
Glarus.
- Stäfa, pagus ad lacum Turicensem inferiorem, 408 m.
- Stargend, supra Riva.
- Starlegia, alps prope Bormio.
- Stätzerhorn, mons prope Parpan, 2576 m.
- Steinhausen, pagus ditionis Zug, 425 m.
- Stelliboden, in meridiem a Realp, 2210 m.
- Stelvio, transitus inter Veltlin et vallem Tirolensem Trafoi,  
2814 m.
- Stockhorn, mons in exitu vallis Simmenthal, 2198 m.
- Stoss, ad ripam dexteram lacus Urnensis inferioris, 1912 m.
- Strahleck, mons inter Finsteraarhorn et Schreckhörner,  
3487 m.
- Strela, transitus inter valles Rhaeticas Schanfigg et Davos,  
2377 m.

- Stresa, pagus ad lacum Verbanum.
- Suèna, alps in valle Bormiensi di Sotto.
- Sulegg, mons in valle Lauterbrunn, 2412 m.
- Suna, pagus prope Pallanza ad lacum Verbanum.
- Surenenecke, transitus inter Uri et Unterwalden in septentrionem spectans a monte Titlis, 2305 m.
- Sustenberg, inter vallem Urnensem Mayenthal et vallem Bernensem Gadmenthal, 2268 m.
- Tagliaferro, mons in septentrionem versus a Riva, 2966 m.
- Tarasp, aquae in valle Engadin inferiore, 1390 m.
- Tardisbrücke (Pons Medardi), prope Ragatz, 502 m.
- Tartano, vicus in valle Tartano, 800 m.
- Tartano, Val, infra pagum Ardenno in vallem Tellinam inferiorem patens.
- Tasna, Vallis, prope Ardez, 1879—2282 m.
- Tête-noire, mons inter vallem Valisiacam Trient et Valorcine in Sabaudia in orientem versus a monte Dent de Morcles, 2884 m.
- Teufelsbrücke, ad viam montem St. Gotthard transgredientem, 833 m.
- Thäingen, inter Schaffhausen et Singen, 453 m.
- Thonon, oppidum ad lacum Leman, 375 m.
- Thun, oppidum Bernense ad lacum ejusdem nominis, 585 m.
- Thusis (Tusauna, Curtis Tosana), oppidulum ad claustra Viamala, 709 m.
- Tirano, oppidulum in valle Tellina ad confluentem Poschiavo et Adda, 460 m.
- Titlis, mons in confinio civitatum Uri, Unterwalden et Bern, 3239 m.
- Tödi, mons inter Graubünden et Glarus, 3623 m.

Torembé (Torembec), vallis in supremam vallem de Bagnes patens, 1608 m.

Torre, pagus in valle Malenco.

Torrigia, inter Como et Argegnio ad lacum Larium, 212 m.

Torto, Vallis di, prope Livigno.

Tourbillon, castellum prope Sitten, 750 m.

Tournette, mons supra les Plans in Ormonts-dessus, 2543 m.

Tourtemagne (Turtmann, Turris magna), pagus ad Rhodanum inter Siders et Visp, 672 m.

Tovo, mons in Valsesia inferiore inter ortum brumalem et meridiem a monte Boscarola.

Trachsellauenen, alps in fundo vallis Lauterbrunn.

Travaglio, vallis in orientem versus a lacu Verbano.

Trella, alps et vallis prope Trepalle.

Trepalle, vicus in valle di Vallaccio in orientem a valle di Livigno.

Tresivio, pagus in orientem versus a Sondrio.

Trinser See, lacus prope Hohentrins in occasum versus a Chur.

Trobaso, pagus in occasum spectans ab oppido Intra ad lacum Verbanum.

Tschietscher Alp, in fundo vallis Rhaeticae Somvix, 2858 m.

Tugensis lacus, 417 m.

Tuors (d'Uors), Vallis, in orientem versus a pago Bergün.

Turlo, Monte (Fallerhorn), in orientem versus a Monte Rosa, 3139 m.

Uldis, vicus prope Haldenstein sub radicibus montis Calanda.

Unterschächen, pagus Urnensis ad torrentem Schächen, 1020 m.

Untervaz, pagus in radicibus septentrionalibus montis Calanda, 562 m.

- Urdenalp, inter pagos Erosa et Parpan.
- Uri, ferocissima et coelo asperrima inter civitates Helvetiae, vallem fluminis Reuss ejusque valles reductas amplectens.
- Urriothstock, mons in valle Urnensi Isenthal, 2932 m.
- Urnerboden, vallis (1387 m) inter Klausenpass (1962 m) et pagum Lintthal (682 m).
- Urschai, vallis Rhaetica in recessu vallis Tasna.
- Ütliberg (Ütli, Uto), supra Zürich, 873 m.
- Ürzlikon, vicus Turicensis prope Kappel.
- Uzza, pagus in valle Furva prope Bormio.
- Valaccetta, alps prope Bormio.
- Valaccia, vallis in meridiem versus a Trepalle in confinio Bormiensi.
- Valatscha, vicus prope Tarasp.
- Valdobbia, inter vallem Gressonay et vallem Vogna; hospitium 2548 m.
- Valdone, alps infra montem Canale et vallis inter Torre et Sondrio in vallem Malenco patens.
- Valduggia, vicus in meridiem versus a Borgosesia, 448 m.
- Vallettes, Les, vicus prope Bovernier.
- Valisia, antiquae civitatis ager cunctam Rhodani vallem supra oppidum St. Maurice et sinistram Rhodani ripam inter St. Maurice et lacus Lemani oram amplectens.
- Vallerii, I, alps prope Riva.
- Vallis Rhodani, a fontibus Rhodani usque ad partem orientalem lacus Leman porrecta.
- Vallon d'Arpette cfr. Arpette.
- Vallon d'Arveran in monte Reculet.
- Vallunga, vallis in occasum versus a Cime di Plator in valle Viola prope Bormio.

- Valmuggia, pagus in occasum versus a Varallo in Pedemontio.
- Valorcine, vicus in occasum spectans a montibus Tête-noire et Col de Balme, 1289 m.
- Valsassina, in orientem spectans a lacu Lario inter Bellano et Introbbio.
- Valsesia, in meridiem spectans a Monte Rosa.
- Varallo, oppidum ad confluentes Sesia et Mastallone, 462 m.
- Varese, oppidum inter Como et Laveno.
- Vättis, pagus sub radicibus occidentalibus montis Calanda, 947 m.
- Vegezzo, Vallis di, in orientem spectans a Domodossola.
- Veltlin, vallis secundum flumen Adda a monte Stelvio ad lacum Larium porrecta.
- Vengeron, vicus ad lacum Leman in septentrionem spectans ab urbe Genf.
- Vergy, mons prope Genf, 2286 m.
- Vernier, pagus prope Genf, 448 m.
- Vetan (Fettan), pagus supra Tarasp, 1647 m.
- Vevey, oppidum ad lacum Leman, 375 m.
- Veyrier, pagus sub radicibus montis Salève, 428 m.
- Vièra, Vallis, in septentrionem versus a pago Livigno.
- Vicosoprano, pagus in valle Bergell, 1065 m.
- Villagio, vicus ad viam per jugum montis Simplon ducentem.
- Villeneuve, oppidum ad lacum Leman in orientem versus ab ostio Rhodani.
- Villette, pagus prope Genf, 412 m.
- Visp, Aquae thermales, per errorem commemoratae pro Visperthermen.
- Visp, oppidulum Valisiacum in valle Rhodani, 657 m.

- Visperthermen (Schaer. *En.* p. 55), Visperterminen s. Visperterbinen, pagus prope Visp, 1366 m.
- Vogna, flumen et vallis (1450 m) in meridiem versus a Riva in Valsesia.
- Voirons, Les, mons in Sabaudia in orientem versus ab urbe Genf, 1406—1456 m.
- Volaterra cfr. Folaterra.
- Wachseldorn, vicus Bernensis ad Buchholterberg.
- Waldnacht, vallis in radicibus montis Surenen.
- Wallensee, inter Wallenstadt et Weesen in meridiem versus ad montibus Churfirsten, 425 m.
- Wänglisalp (Wängisalp), in valle Urnerboden infra montem Kammerstock, 1700 m.
- Wasen, pagus Urnensis in radicibus montis Mayenstock, 940 m.
- Weissenbach, vicus prope Mettmenstetten.
- Weissenburg, pagus Bernensis ad flumen Simme, 737 m.
- Weissenstein, hospitium in transitu Rhaetico Albula, 2030 m.
- Weissenstein, mons jurassicus prope Solothurn, 1283 m.
- Weisshorn, mons in valle St. Nicolai Valisiae, 4515 m.
- Weismies (Laquinhorn), mons in valle Saas, 4038 m.
- Wengen, pagus in valle Lauterbrunn, 1302 m.
- Wengernalp, inter Lauterbrunn et Grindelwald, 2123 m.
- Wetterhorn, mons supra Grindelwald, 3707 m.
- Wolfgang, St., pagus prope Zug, 450 m.
- Würzbrunnen, ecclesia in silva prope pagum Bernensem Röthenbach, 987 m.
- Yberger Ecke, prope Schwyz.
- Zebru, Monte (Königsspitze), in meridiem versus a monte Ortler, 3869 m.

- Zebru, Vallis, in vallem Furva patens.  
Zermatt, pagus Valisiacus in valle S. Nicolai, 1648 m.  
Zimmerwald, pagus Bernensis in monte Längenberg, 858 m.  
Zofingen (Tobinium), oppidum in Argovia, 436 m.  
Zollbrücke cfr. Tardisbrücke.  
Zug, oppidum primarium civitatis ejusdem nominis, 422 m.  
Zugerberg, in orientem versus ab oppido Zug, 807 m.  
Zürich, urbs primaria civitatis ejusdem nominis, 412 m.  
Zwinguri, arx destructa in aditu vallis Maderanerthal,  
885 m.
-

## II.

## III.

**Index exsiccatorum ex agro Helveticō lichenū.**

*Nota.* Singulis sub numeris primae columnae hujusce tabulae lichenes citati in collectionibus publicis exstant. Infra nomina earundem illarum collectionum in capite hujus tabulae praescripta invenies, benevole lector, numeros quibus in enumeratione systematica Lichenum Helveticorum eadem lichenum species afferuntur.

**Introductio.**

## I.

**De Helvetiae soli natura et coeli temperie**

quamque vim illae quidem habeant ad vegetationem et distributionem lichenum.

Helvetia sita inter  $23^{\circ} 37'$  et  $28^{\circ} 9' 25''$  longit. orient. atque  $45^{\circ} 48'$  et  $47^{\circ} 48' 30''$  latit. borealis ambitu 1675 km agrum circa 41418 □ km amplectitur, in quo agro ejus certe partis terrae, quam nos incolimus, altissimae patent regiones, alpium montes; itaque Helvetia altissima est terra totius Europae. Cujus agri spatium 2096,09 km, i. e. amplius quam undevicesima pars, perpetua glacie nivibusque riget.

Alpium montes continuis jugis juncti, qui decem longitudinis gradus excedunt, e Pedemontio et Sabaudia orsi, cum per Helvetiae dimidiā partem ad meridiem vergentem diffusi sunt, a Rhaetia nomine Tyrolensium sive orientalium alpium porrecti in ipso aditu Helvetiae ad summam altitudinem 4810,5 m, qua est Montblanc, assurgunt.

Media alpium juga, quae media alpium zona dicuntur, neque tamen perpetuo tractu excurrunt, sed in compluria membra solvuntur, eandem quam vallis extentissima Martinach-Chur tenent regionem, quae convallis inter occasum solis et meridiem atque inter septentriones et orientem solem spectat. Quibus jugis utrimque alterae alpium zonae adjunguntur, quarum septentrionalis tota est Helvetiae, australis maximam partem est extra Helvetiorum agrum. Si geologiae ratione rem intuitus eris, alpes instar plicaturaē cujusdam montium sunt, cujus singulae plicae aliae juxta alias exaratae uno eodemque terrae motu et conversione exaggeratae esse videntur; ejus autem montium tractus maxima altitudo in eo loco existit, unde ille motus exortus et in alias circum partes propagatus est, i. e. in ipsa media zona. Itaque hujus in regione nuclei saxorum crystallinorum maximi exstant, qui molibus sedimenti in alveorum formam compressis disjunguntur. Hi sunt alpium Helveticarum nuclei crystallini: 1. Aiguilles rouges, 2. Montblanc, 3. mons St. Bernhard, 4. Valisia meridionalis, 5. Monte-Rosa, 6. Simplon, 7. alpes Bernenses, 8. St. Gotthard, 9. alpes Ticinenses, 10. Adula, 11. St. Bernhardin, 12. Suretta, 13. Bernina, 14. Silvretta. Eodem tempore eos idque sub finem tertiae, quae in terrae formatione statuitur aetatis in altum sublatos probabile est.

Qui nuclei, si orographiam spectamus, medium alpium Helveticarum zonam efficiunt. Soli partes res fossiles complexae, quae solo nondum in altum sublato cuncta tege-

bant, ubi nunc alpes extenduntur, eae aut discissae nucleis crystallinis se applicant, aut erosione funditus sunt dissolutae, aut — id quod ad maximam primariam partem pertinet — formam plicarum praebent, quae eadem regione ac media alpium juga excurrunt. Omnes fere ab imo ad summum in formatione triasica ita exstructae sunt, ut supra hanc Jurae, cretae, Flyschi genera sint, quae, cum a Sabaudia per Caballiam (Chablais) patent, lacu Lemanu interrupta inter Rhodani medianam vallem atque mediterranea civitatum Waadt, Freiburg et Bern ab oriente brumali ad caurum versus spatium latius 38 km amplexa a lacu Thunensi et Brienzio ad lacum quatuor silvestrium civitatum patent atque per Suiziam et Glaronam ad lacum Wallensem et Rheni vallem indeque ad partem austriacam Vorarlbergiae pertinent.

Saxorum genus hujus regionis proprium est Verrucano. Quae saxa, quorum natura adhuc obscura est et recondita, inter Sernfthal et lacum Wallensem ad Graue Hörner et Seezthal diffusa atque inter moles sedimenti sita haud dubito an Permicae formationi sint attribuenda.

Anthracitae et carbonis fossilis genera, quae sub radicibus montium Dent de Morcle et Dent du Midi in Valisia atque sub monte Titlis et in latere septentrionali montis Tödi existant, aetate illa antecedunt vetustiorisque sunt formationis.

Altera jugorum series et continuatio, quae a Gallia orta ad Bellegarde Rhodano scinditur, ubi Helvetiam occidentalem transiit, in finibus septentrionalibus, quos Rhenus efficit, ex Aargovia et Scafhusio in Germaniae regione excurrit, Juras. Qui montes ut ab omni parte nivium molibus vacant, ita arboribus stirpibusque undique consiti nisi paucis in locis nuda saxa non ostentant. Octavam fere partem totius Helvetiae occupant atque ubi intra ejus fines altissimi sunt — qua est mons Dôle — ad 1552,5 m assurgunt.

Saxorum genus, ex quibus hi montes constant, quamquam per totam Europam reperitur, a Geologis nomine quod ab his ipsis montibus ductum est — Jura appellatur. Habet saxa margacea et arenacea atque in primis calcaria, quorum inferiores ordines coloris fusci, superiores subflavi et albi sunt.

Idem genus in septentrionalibus alpium zonis juxta medias zonas pro currentibus, inde a finibus australibus lacus Lemanii ad lacum Wallensem ita diffunditur, ut montes calcarios efficiat.

Jurassum una cum alpibus in altum esse sublatum verisimile est.

Inter alpes atque Jurassum ab occasu brumali ad regionem aquiloniam mediterranea Helvetica sita sunt; earum valles maxime de pressae plerumque altitudinem 390 m s. m. non superant. Quae regio tumulosa circa 12110 □ km amplectens, cum praecipue tertiariae, diluvialis, alluvialis formationis sit, in primis saxi quoddam genus, quod appellant Molasse, ejusque con glomerationes et psammitides continet.

Perm ultis denique in locis mediterraneorum Helvetiorum atque Jurassi in superficie terrae modo singularia, modo coacervata saxa erratica conspicuntur, quae ex alpibus profecta, cum moles earum con glaciatae priore tempore late paterent, longe effusa sunt.

Eius terrae, quae ab 400 m ad 4000 m assurgit, locis aliis aliud esse coelum appareat. Locarno media coeli temperie  $14^{\circ}$  C. est; Basilea, Aaravia, Geneva, Turicum, Lucerna, Solothurn, Curia annua est temperatione inde  $8,8$  ad  $10^{\circ}$ , Sti Galli oppidum  $8,4^{\circ}$ , Chaux de fonds  $7,6^{\circ}$ , Zermatt  $5,5^{\circ}$ , hospitium St. Gotthardi —  $1,3^{\circ}$ , hospitium St. Bernardi —  $1,4^{\circ}$ , fastigium Monterosae —  $13^{\circ}$ . Ex quaestionibus, quas Schlagintweit fratres in Monterosa fecerunt, constat centesimo sep-

tuagesimo quinto dimidio (175,<sub>5</sub>) metro calorem minui uno Celsii gradu. Quamquam venti, qui ex regionibus australibus orti certis in locis flare solent, interdum media hieme regionum montanarum et subalpinarum aëra ita calefaciunt, ut multo sit calidior quam vallium. Contra haud raro fit, ut tempestates pluviis vel tempore aestivo calorem regionum montanarum subito refrigerent; unde efficitur, ut differentia, quae inter medium coeli aestivi et hiemalis temperationem exstat, quanto locus quis est editior, tanto minuatur. Denique ad coeli naturam quarundam regionum situs et cursus montium vim magnam habent, quippe qui aut frigidiores ventos arceant, aut solis radios reflectant. Itemque declivia montium ad meridiem versa septentrionalibus sunt calidiora, quae res efficit, ut illis in locis octo vel quatuordecim diebus prius flores dehiscant.

Copia humorum de coelo manantium Helvetia abundat. Praeter Britanniam, Bataviam, Scandinaviam saepissime Helvetia atque in primis regiones montuosae nebulis obteguntur. Berna 66 dies anni, St. Gotthardus 278 nebulosos videt. Cum Helvetiae montibus aér refrigeratus est, etiam pluviae permultae cadunt. In alpium fastigio septentrionali vis pluviarum est 33—35<sup>“</sup> diebus 150 in anno pluvialibus, cum in Germania mediterranea vix 22<sup>“</sup> sit. Nivis casus, qui in locis campestribus atque in vallis inferioribus regionum montuosarum ad septentriones spectantium mense Novembri incipit, raro ante mensem Decembrem solo inhaeret; in altissimis montibus perpetuae nives jam initio Octobris cadunt. Solvitur glacies in regionibus planis jam mense Martio, in alpibus tantum mense Majo. Ceterum etiam extra ea tempora, dum in campis pluit, in montibus ningit. Alpium in latere septentrionali loca supra 2660 m alta, in latere

meridiem versus sito loca supra 2990 m alta perennibus nivibus sunt contecta.

Consideranti hanc alpestrium locorum naturam et conditionem in mentem venire debet pro varietate saxorum, coeli temperie, humorum vi inter omnes alias terras vel in primis idoneam esse maxima omne genus lichenum copiae generandae. Exceptis iis lichenibus, qui in ora maritima reperiuntur, et in campis et in omnibus locis superioribus, quaecunque est earum altitudo, lichenum, quotquot constat in media Europa nasci, majorem numerum Helvetia habet.

In regionibus quibusdam, in primis in Valisia et in Tessino lichenum ratio prope accedit ad similitudinem eorum qui proprii sunt partium Europae proprius ad meridiem versarum, ut: plures species e genere *Omphalaria*, *Gomphillus calicioides*, *Heppia Guepinii*, *Lecanora Schleicheri*, *nodulosa*, *Dirina repanda*, *Urceolaria ocellata*, *Lecidea testacea*, *albilabra*, *mammillaris*, *caesiocandida*, *Arthonia dispersa*, *galactites*.

Contra in iisdem illis nivosis montium jugis nonnullae proveniunt species, quae extremo septentrioni sunt peculiares et propriae, ut *Gonionema velutinum*, *Phyllum endocarpoides*, *Baeomyces placophyllus*, *Parmelia alpicola*, *Lecanora fuscescens*, *oculata*, *badiofusca*, *peliscypha*, *Lecidea foveolaris*, *rubiformis*, *Diapensiae*, *cinnabarina*, *Verrucaria leucothelia*, *sphinctrinoides*. Hi lichenes, ut Heorio quidem (*Urwelt der Schweiz* p. 540) videtur, haud scio an pariter atque alia quae-dam genera plantarum et animalium altioris ordinis glaciali tempore e regionibus septentrionalibus in Helvetiam dispersi et disseminati fuerint atque cum jam pridem ex interjacentibus terrarum tractibus coeli temperie calidiore et aridiore facta sublati et extincti sint, sedem et domicilium ibi retinuerint.

In campis ad 800 m editis et prope hominum domicilia et in agris silvisque lichenum Helveticorum eadem exstant species, quae mediterraneae Europae sunt propriae. Regiones montanae usque ad ea loca, ubi arbores provenire desinunt, lichenibus cortici arborum atque in primis truncis Acerum adhaerentibus abundant. Editioribus in locis *Usneae*, *Everniae* stirpes ramosque Coniferarum contingunt et vestiunt. Betulis, laricibus, arvis, quae altioribus locis quam hae nascuntur, *Chlorea vulpina* est ornamentum. Veterum arborum stirpes atque humidum solum silvestre *Cladoniae*, *Cetraria islandica*, *Platysma pinastri* et *juniperinum* incolunt. Denique *Nephroma tomentosum*, *Stictina sylvatica*, *fuliginosa* in hac potissimum regione inveniuntur. Cum regiones montuosae ventis saepe calescant, valles autem per maximum anni partem areant, efficitur, ut multi lichenes, qui nusquam nisi in campis nasci solent, ut *Ramalina fraxinea*, *Physcia ciliaris*, montanas Helvetiae regiones obtineant, campi autem regionum quarundam lichenibus, qui alibi gignuntur, careant.

Regionum subalpinarum et alpinarum species, quae solae inter 1500 et 2500 m nascuntur, hae fere sunt propriae: *Cladonia gracilis*, *ecmocyna*, *macrophylla*, *Cladina amaurocraea*, *Thamnolia vermicularis*, *Platysma nivale*, *cucullatum*, *Alectoria ochroleuca*, *Parmelia tristis*, *lanata*, *Solorina crocea*, *Lecanora epibrya*.

Summos montes incoli docent Kremplhuber (*Bayr.*), Theobald et Brügger (*Bündn. Jahresb.*), Anzi (*Cat.*) et Baglietto-Carestia (*Anacr.*): *Collemate melaeno* var. *terrestri*, *Sphaerophoro fragili*, *Stereocaulo condensato*, *Ramalina capitata*, *Dufouria ramulosa*, *Parmelia fahlunensi*, *lanata* et *minuscula*, *Parmelia encausta* et varr. *intestiniformi* et *atrofusca*, *Physcia caesia* var. *teretiuscula*, *Solorina crocea*, *Gyro-*

*phora reticulata, hirsuta, cylindrica, tornata, flocculosa, polyphylla, corrugata, Lecanora dispersoareolata, concolore cum varr. angusta et subeffusa, L. elegante, polytropa, cacuminum, limborinella, Lecidea confluente, declinante, auriculata, Güttingeri, Casimiri, promiscente, ecrustacea, Kündigiana, armeniaca, melaleuca, atrobrunnea, subnivea, leptolepidea, alpicola, effigurata.*

Omnium locorum, qualiacunque se habent altitudine, sunt communes: *Baeomyces icmadophilus, Cladonia pyxidata, Evernia furfuracea, Peltigera canina, Solorina saccata, Lecanora elegans, Urceolaria scruposa, Lecidea decipiens, vesicularis, candida, umbilicata, geographica, Verrucaria nigrescens, plumbea.*

Secundum soli altitudinem ad lichenum incrementum natura saxorum geognostico-chemica plurimum confert. „Pura calcis et silicis genera vel maxime inter se sunt opposita et contraria; quorum sui utrique peculiares sunt lichenes, quibus nonnunquam etiam e longinquo saxorum natura cognoscitur“ (Theobald, *Bündn. Jahresb.* 1858 p. 107). *Parmelia stygia, Gyrophorae species omnes, Lecanora chrysoleuca, ventosa, chlorophana, Lecidea geographica* solae in siliceis, *Lecanora gypsacea, calcarea, Lecidea candida, decipiens, umbilicata* in calcariis saxis nasci solent. Saxorum transmutatione in Helvetia frequentissima, qua calcaria saxa partes siliceas, crystallina saxa calcarias saepe recipiunt, efficitur, ut ab hac ratione ac natura discedi non raro invenias. Haec saepissime in schisticis usu veniunt. Quae quidem schista Theobald est auctor habere saepius si sunt arenacea — ita autem nonnunquam sunt ut pro veris psammitidibus habeantur — lichenes saxorum siliceorum, sin autem sunt calcaria vel argillacea, lichenes habere saxorum calcariorum, idem est auctor serpentina saxa, quippe quae laevibus sint lateribus

et in modum testarum fragilia, cum aliarum plantarum plerumque impatientia esse tum maxime lichenum. Quamquam haec in Helvetia species saxis innatae serpentinis inventae sunt: *Pyrenopsis sanguinea*, *Collemodium turgidum*, *Cladonia gracilis*, *Parmelia prolixa*, *Physcia pulverulenta*, *caesia*, *lithotropa*, *Lecanora saxicola* f. *Garovagliae* et var. *diffracta*, *dispersoareolata*, *elegans*, *murorum* cum var. *obliterata*, *tegularis*, *ocellata*, *Bischoffii*, *alphoplaca*, *argopholis* var. *thiodes*, *badia* var. *cinerascens*, *polychroma* var. *ochracea*, *calcarea*, *candida*, *Veronensis*, *pruinosa*, *Urceolaria actinostoma*, *Lecidea decipiens*, *rubiformis*, *vesicularis*, *alutacea*, *candida*, *cinereovirens*, *conglomerata*, *syncomista*, *leucophaea*, *albocoerulescens*, *tesselata*, *Brunneri*, *aglaea*, *badioatra* f. *rivularis*, *discolor*, *tenebrosa*, *saxatilis*, *chalybeia*, *geographica* cum var. *atrovirente*, *Verrucaria pulvinata*, *Hochstetteri*, *lecidoides* var. *sphaerospora*, *glaucina*, *chlorotica*.\*

\* Apud Kremplh. (*Bayr.*) hosce lichenes ut serpentino saxo inhaerentes video esse relatos: *Parmeliam sorediatam*, *Pannariam microphyllam*, *Lecanoram ferrugineam* f. *festivam*, *epixantham*, *alpinam*, *cinereum*, *Lecideam confluentem*, *parasemam* var. *latypeam*, *distinctam*. Apud Lamy *Cat.* ut in serpentino inventa enumerantur: *Collema pulposum* var. *granulatum*, *Cladonia macilenta* f. *scolecina*, *Physcia parietina* var. *aureola*, *lychnaea* var. *leprosa* Lamy, *speciosa*, *pulverulenta* var. *detersa*, *subdetersa* Nyl.,  *aquila*, *albinea*, *tribacia*, *caesia*, *Pannaria rubiginosa*, *Lecanora saxicola* var. *diffracta*, *erythrella*, *confragosa*, *liparina* Nyl., *haematomma*, *caesiocinerea*, *lacustris* f. *ochracea* Lamy, *Pertusaria communis* var. *saxicola*, *inquinata*, *Lecidea Richardi*, *Verrucaria polysticta*, *cataleptoides*. Crombie *Lich. Brit.* ex Anglia hos tantum ex serpentino lichenes commemorat: *Lecanoram admissam* Nyl. et *Lecideam Brunneri*, item Tuckerman (*Synopsis of the North American Lichens*) ex America boreali: *Lecanoram bolacinam* (Tuck.) et *Brunonis* Tuck. — Körber *S. L. G.* et *Pg.* in hoc genere saxy has species affert: *Heppiam Guepinii*, *Lecanoram rubellianam*, *confragosam*, *umbrinam*, *smaragdulam* var. *sinopicam*, *Lecideam coarctatam* (*rosellam* Krb.), *fumosam* var. *ocellulatam* Schaer. *En.* p. 110, Hepp *Fl. E.* 722.

Et per saxa erratica fit, ut hic aut illic lichenes inveniantur, quippe quibus lichenes e sedibus primis in ea loca transferantur, ubi et propter regionis altitudinem et propter naturam soli nasci non consuerunt. Ut *Stereocaulon alpinum* saxorum molibus, quae in lateribus montium glacialium inhaerent, et torrentibus, qui ex iis devolvuntur, ex altissimis alpium cacuminibus in campos descendit, multique lichenes siliceorum saxorum proprii sunt in saxis erraticis montium Pilatus et Salève, qui tamen montes e calcariis saxis constant. (Cfr. Heer, l. c. p. 538 adnotatio.)

Lichenum aquatilium consentaneum est eos, qui in ora maritima nasci solent, in Helvetia non inveniri. Fontes quoque et rivuli calcis particulas continentes lichenum steriles sunt; contra rivuli alpini saxa silicea interfluentes lichenum admodum sunt feraces. Lichenes torrentium, riparum litorum etc. proprios Helvetia habet hos:

*Sirosiphonis* species plurimas, *Omphalariam Heppii*, *Collema Mülleri*, *subtorulosum*, *Collemopsidem cleistocarpam*, *Rhemicam*, *Pannarium nigram* f. *Tantaleam*, *Lecanoram melanaspidem*, *Genevensem*, *subdepressam*, *lacustrem*, *chrysophanam*, *odoram*, *suaveolentem*, *Lecideam verniceam*, *inundatam* cum var. *cinerascente*, *badioatram* f. *rivularem*, *Endocarpon leptophyllum*, *fluvatile*, *Verrucariam fissam*, *clopimam* var. *clopmoidem*, *latebrosam*, *margaceam*, *aethiobolam* var. *litoream*, *pissinam*, *hydrelam* cum var. *laevata*, *muralem* var. *puteanam* et f. *confluentem*, *aeneovinosam*, *Endococcum hygrophilum* cum f. *minore*.\*

---

\* Hic adscribendum est *Lecanoram sympageam* f. *sciophilam* (Add. II 389) in Hepp *K. Z.* 94 esse distributam necnon *Pertusarium multipunctam* (629) speciem esse autonomam.

## II.

**De lichenum apud Helvetios studiis.**

Jam sexto et decimo saeculo, quo tempore cum herbarum scientia erat perrara, tum peritia lichenum fere nulla, a Conr. Gessner et Leon. Fuchs, Helvetiae viris doctissimis, atque initio septimi et decimi saeculi a Casp. Bauhin lichenes nonnulli sunt descripti; item anno 1680 a Joanne Jac. Wagner in „*Historia naturali Helvetiae curiosa*, Tigur. 1680“ quaedam de lichenibus Helvetiae in vulgus edita sunt. Postquam Tournefort 1699, quid interesset inter lichenes et muscos, cognovit docuitque illos proprium herbarum esse genus, cuius 44 species descripsit: in hac arte profecit Scheuchzer, Turicensis ille, qui in libro „*Itinera Alpina*“ 13 species antea ignotas pertractavit.\* Successit ei Alb. de Haller, vixit autem in medio saeculi superioris, unus ex peritissimis lichenum cognitoribus; vulgavit ille quidem 20 novas species in Helvetia nascentes, 200 descripsit.\*\* Post mortem Halleri lichenum studium apud Helvetios 30 annos conquievit et jacuit, cum extra Helvetiam lichenum peritia maximos progressus fecit, id quod in primis virorum Weber, Persoon, Hoffmann, Lamarck, Villars, Dickson, Smith, Borrer, Turner, Acharius, Swartz, Ehrhart opera factum est.

Helvetiorum 30 illis annis nisi Dris d'Ivernois excursiones in agro Neuenburgensi (cfr. Cornaz, *Lichens jurassiques* p. 5) studia et quaestiones possumus commemorare

lichenologicas nullas. Recoluit et revocavit anno 1805 rationem lichenum J.-C. Schleicher in „*Plantis cryptogamicis Helvetiae*“, quae collectio unacum „*Catalogo plantarum Helvetiae*“, quem postea scripsit, plurimum contulerunt, ut *Helvetiae* lichenes vulgarentur. Eodem illo tempore Challiet in lichenum studiis versatum esse commemoratu est dignum (cfr. Cornaz l. c. p. 6).

Vel maxime praeter ceteros contulit ad lichenum scientiam Ludw. Eman. Schaefer, clericus Bernensis († in pago Bernensi Belp die 3º Febr. 1853). Is per 36 annos et colligit et investigavit atque collectione quae inscribitur „*Lichenes Helvetic exsiccati*“ multisque aliis, quos edidit libris\* non solum praeter ceteros oculos et attentionem virorum doctorum in lichenes Helveticos convertit, sed etiam ipse cum viris Floerke, El. Fries, Wallroth, Blytt, Wahlenberg, Sommerfelt, W. Hooker, Taylor, Flotow, Laurer, Mougéot, Ramond, Dufour, Duby, Delise, Garovaglio pro virili parte plurimum contulit ad scientiam lichenologicam inchoandam et excolendam. Una cum hoc Dr. Joann. Jac. Hegeschweiler, medicus Rifferswilensis († Riffersweil die 8º Mart. 1860) cum in mediterraneis *Helvetiae* lichenibus colligendis operam navavit, tum diligentiam et curam botanicorum in lichenes calcarios montis Pilatus ut attentione et studio dignissimos flectebat.

Simul Sanctus Garovaglio in vallibus montibusque ejus Rhaetiae partis, quam Itali provinciam Sondriensem vocant,

maximum numerum specierum vel rariorum vel adhuc incognitarum collegit. (Cfr. Anzi Cat. p. VII et VIII). Moritzi quoque et Heer inter eos, qui alpium orientalium lichenes investigarunt, nominandi sunt. Eadem ipsa tempestate (1842 ad 1848) in confinio Vallorbes Agassiz, in Jurasso Cornaz\* lichenum investigationem instituerunt.

Quorum vestigiis instituit Dr. Phil. Hepp e Palatinatu Bavarico, qui inde ex anno 1824 suo de lichenibus Würzburgensibus libro apud botanicos nobilitatus est. Qui cum omnium quendam libertatis amorem anno 1849 patria profugus ad exitum fere vitae (Frankf. a. M. die 5<sup>o</sup> Febr. 1867) liberalissimo Helvetiorum hospitio uteretur, vix dum solo mutato ad lichenum studia in pago Turicensi rursus amplexus eorum collectionem vulgavit; itemque fuit adjutor Schaeferi in edendis *Lichenibus Helveticis*. Postea peragrande regiones usque ad lacum Wallensem, superiorem Rheni vallem, vallem Engadin, pagos Unterwalden, Schwyz, Luzern, Uri, Aargau, Solothurn, Neuchatel et Baselland pervestigavit. Quanta in lichenum studio fuerit ejus opera atque industria, ex collectione Lichenum Europaeorum appareat, cuius autem editio in illa tempora incidit, in quibus recentissimi illi progressus atque incrementa opera Tulasne fratrum, Nylander, Schwendener in lichenologia fieri cooperunt. Studio histologico instituto cum lichenum peritia ad certam quandam artis rationem revocata est, tum species microscopica analysi sunt distinctae. Drem Hepp ea studia diligentissime exercuisse schedulae singulis collectionis particulis additae cum annotationibus optimis atque synonymia egregia maxime probant. Sed non solum ut lichenum cognitio augeretur, sed etiam alios ad

eandem artem adducendo, ut in vulgus emanaret, Dr<sup>r</sup> Hepp effecit. In primis et in Helvetia et in australibus Germaniae partibus vir doctus magnum botanicorum numerum ad studium lichenum incitavit et singulari quadam morum comitate eos adjuvit. Idem G. Theobald († Curiae die 15<sup>o</sup> Sept. 1869), cuius nomen in geologia est celebratum, in excursionibus montanis ad lichenes oculos convertit indicemque lichenum Rhaeticorum\* copiosum conscripsit, cui Killias\*\*, Theobald ipse\*\*\* et Brügger† supplementa haud exigua subjunxerunt.

Helvetiae in regionibus ad occidentem vergentibus Dr. J. Müller, rei herbariae professor in universitate Genevensi, qui ut inter omnes constat, etiam in aliis botanicae generibus egregie elaboravit, in lichenum studio versatus prescriptionem lichenum Genevae atque locorum urbi huic propinquorum edidit. Item multa in ratione Lichenologiae nova in Valisia invenit. †† Nuperrime in agro Genevensi Dom. J. Rome operam suam cum eo conjunxit.

|                             | Summa .            | 1342 |

Omnibus, qui in hoc libro conscribendo, sua opera suoque consilio mihi auxilio fuerunt, summas gratias ago, cum Dominis Anzi, Baglietto, Carestia, Gisler sen<sup>i</sup>, Hegetschweiler jr<sup>i</sup>, Killias, Metzler, Müller, tum maxime autem D<sup>r</sup>i Nylander, qui summa liberalitate et cum otii sui detimento operam egregiam mihi impertivit.

Ne illud quidem est praetermittendum, mihi constitutum et deliberatum esse, ut quotannis additamenta, aut si opus erit, correcta aut emmenda in publicum edam, qua quidem in re ut mihi in posterum iidem isti doctissimi viri eadem atque ante munificentia et generositate auxiliari velint, majorem in modum rogo et obsecro.
