NEW SKI RUNS AT MUERREN

This coming Winter, ski enthusiasts from all over the world will find new ski-ing opportunities at Muerren, thanks to the construction of the Stechelberg-Gimmelwald-Muerren-Birg Cablecar (up to 8,830 feet altitude). Continuation of the cablecar system has already been assured. The line is being built according to the most modern methods, and within eighteen months its luxuriously appointed, eighty-place cars will travel up to the peak of the Schilthorn (9,800 ft.). In preparation for the Arlberg-Kandahar Ski Races to be held at Muerren on 11th-13th March 1966, work has already begun at the popular mountain resort on various extra safety measures and improvements to its extensive *pistes*. The almost legendary "Canon Barrel" segment of the run from the Schilthorn Hut (8,025 ft.) down to the Blumental is being smoothed out, to give medium-class skiers a chance to enjoy the pleasures of this unique route.

Incidental extra: world's widest zoom

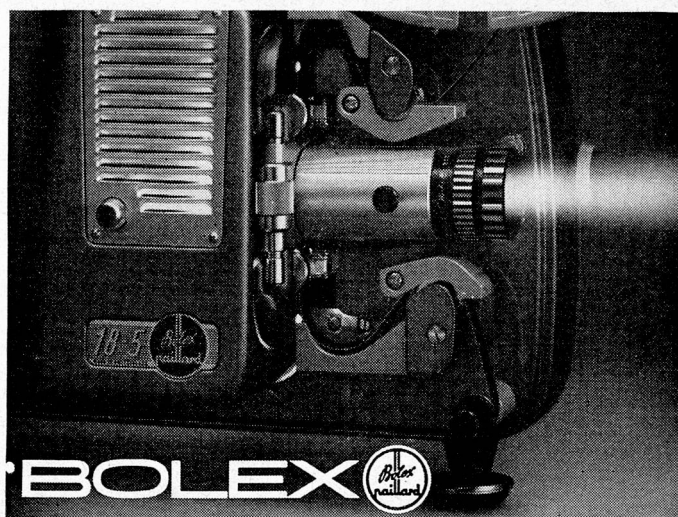

Incidental, because a zooming range of 12.5 mm is not so important as the quality on your screen. And it is in the unsurpassed image that the true satisfaction of the Bolex 18-5 projector lies. It takes a 12-element lens and has a highly sophisticated system of vertical and horizontal frame register.

The result is a crisp, steady picture. Price £69.10.0

Totally reliable automatic threading plus Paillard-Bolex 12.5 mm, f/1.3 zoom lens. It features an integral mirror/condenser lamp; switched room light socket and the Bolex high-precision claw and gate movement.

Bolex slow-motion shutter adjusts automatically on 5 frames per second to give 9 light interruptions per frame instead of the usual 3. Result: no flicker.
