SWISS MACHINE FOR A GERMAN FIRM

A big plant supplied by the Bülach engineering works (Zurich-Switzerland) — specialising in the manufacture of machinery and plant for the processing of paper, cardboard, plastic film and aluminium foil — was recently put into operation in a German firm. This machine is designed above all for coating aluminium foil, paper-aluminium foil plywork, as well as paper and cardboard with PVC dispersions and solvent based lacquers. The plant has an application head with an air jet and a coating group with three rollers, which can be used in turn. The equipment has been designed with a view to the subsequent incorporation of a dry gluing station and an additional peeling machine. The air jet, recuperation tank and counterblower roller group can be removed on rollers whenever they are not required. The

infra-red drying hood is also moved sideways by means of a servo-motor. Thanks to their pneumatic opening system, the drying hoods allow ease of access to the driving rollers in the drying tunnel. Each hood is provided with its own individual temperature checking device. The machine also possesses a special pumping station with a tank with 3 tubes for PVC dispersions. The effective width of this machine is 1,250 mm and the speed reached 200 metres a minute. The 6-metre long drying tunnel is heated by a thermal liquid.

WATCHMAKING AGREEMENT BETWEEN NORTH KOREA AND SWISS INDUSTRY

The Democratic People's Republic of Korea has placed an order with Swiss industry for machinery and various

equipment for the manufacture of watches. The contract recently signed in Korea by a Geneva engineering firm is for a value of 34 million Swiss francs; it comprises the delivery of production equipment, the provision of technical knowhow and the complete fitting out of the factory. The output of the Korean factory (400,000 watches a year) will be marketed solely within the country. The cost of the contract also includes the financing of this industrial operation for a period of three years after the delivery of the equipment, which is scheduled for 1975. This is the first transaction of this size that Swiss industry has signed with the Democratic People's Republic of Korea; it coincides with the establishment of commercial relations between the two countries. In 1973, North Korea imported 20,000 Swiss watches and movements, worth 2.6 million francs; Korea thus came 61st in the Swiss watchmaking industry's markets.

A New EDITOR for The Swiss Observer

The Advisory Council of "The Swiss Observer" regrets to announce that the Editor wishes to resign shortly. This interesting position is therefore offered to any man or woman, Swiss or other national thoroughly familiar with Switzerland, who is interested in Swiss problems, political and economic life, education and culture and anything which occurs in Switzerland.

Knowledge of German and/or French and the ability to write in English are essential. Close co-operation with Swiss organisations in London and the U.K. and some administrative work are part of the job.

For further information please contact Oscar F. Boehringer, 55 Woodstock Road, London NW11 8QD.
