100 YEARS

of precision turned parts from MULLER

In 1976 Muller celebrated its centenary of manufacturing precision turned parts and small precision tools including solid carbide drills. With production facilities in Switzerland, England and France customers in all industrialised countries can be served quickly and reliably. Quality and precision has always been foremost and Muller's skilled production technicians meet the most vigorous requirements and specifications for all industrial applications.

The continuing growth of demand has resulted in expansion, modernisation and co-ordination of production facilities with a reputation for quality that is second to none.

SWITZERLAND

Congratulations

We have just heard that the Union Bank of Switzerland has been awarded first prize in the jubilee window display competition by the City's Broad Street Ward Club. The Union Jack measured 7 ft. 6 ins. by 3 ft. 9 ins. and consisted of 2,700 flowers, 1,800 of which were cornflowers, the rest were red and white carnations. Unfortunately our black and white reproduction does not do full justice to the colourful display but they do serve to appropriately mark an important achievement by UBS. True ambassadors indeed.

Step by Step

British Industry's increased acceptance of Swiss Power engineering technology and products has been accompanied by an increase in the demand for UK based engineering and service facilities.

British Brown-Boveri's programme of planned expansion is geared to meet this demand. Last year saw the opening of a new manufacturing facility in Telford, Shropshire and earlier this year a new Repair and Maintenance facility for Scottish Industry was established in Aberdeen.
