# Undoubtedly the most advanced cantilever shelving system in the world

## STOCKRACK II by Acrow Automation

When the Acrow Automation designers and engineers produced Stockrack II they *knew* that it was the most efficient shelving system available... a system providing superb visual control of stock plus the highest possible level of space utilisation... a system which can easily be adjusted for different shelf heights and aisle widths.

And now experience has proved their belief to be more than justified. Research proves that the shelves provide exactly the optimum depth and height... that the absence of uprights in the front face gives access where required and greater capacity (the whole system gives 10% more uninterrupted shelf room) ... that the total design gives a clean aesthetic look to the storage area.

Another vital feature. Stockrack II provides the basis for single and multi-tiered potential, or single tier with mezzanine floor—an invaluable aid for optimum storage capacity.

And remember, working storage doesn't depend only on hardware; it calls for know-how, experience and design expertise. Contact Acrow Automation now. They have the solution to your storage problem.
