MODELLING NEWS

Liliput Hupac carriage in HO scale

Peter Marriott looks at one of Liliput's recent standard gauge releases.

This model of an Epoch V carriage features good detail and smooth running characteristics. The Hupac carriage is an ex-SBB Epoch 5 model that captures the look of the real thing except that it is lot cleaner than the prototype versions of the same thing! The printing on the sides is crisp and the Rolling Road logo adjacent to the door is very well done. The model comes complete with a packet of six yellow handrails to be inserted alongside the doors

– whilst this model requires just 4 handrails usefully an extra two are supplied in case one loses these pieces, a nice touch. This 1:87 model measures 303mms over the buffers. If you want to see these in action stand at Spiez station for an hour or two most days and one will soon be seen.
